

## Specifications (LED strip)

|                  |                           |                       |                     |                     |      |
|------------------|---------------------------|-----------------------|---------------------|---------------------|------|
| LED Quantity:    | 2400                      |                       |                     |                     |      |
| Input Voltage:   | 12 VDC                    |                       |                     |                     |      |
| Power:           | 45 W                      |                       |                     |                     |      |
| Beam Angle:      | 180°                      |                       |                     |                     |      |
| Dimmable:        | Yes                       |                       |                     |                     |      |
| Available CCT:   | White<br>6000K            | Neural White<br>4000K | Warm White<br>3000K | Warm White<br>2700K | Blue |
| Luminous Flux:   | 5040 lm                   | 4600 lm               | 4240 lm             | 3900 lm             |      |
| CRI:             | 90                        |                       |                     |                     |      |
| Operating Temp.: | -20 ~ 50 °C               |                       |                     |                     |      |
| Strip Width:     | 8 mm                      |                       |                     |                     |      |
| Strip Length:    | 16.4 ft (5 m)             |                       |                     |                     |      |
| PCB Color:       | White                     |                       |                     |                     |      |
| Wire Leads:      | 20 AWG                    |                       |                     |                     |      |
| IP Rating:       | IP20 (dry locations only) |                       |                     |                     |      |
| Compliance:      | CE, RoHS                  |                       |                     |                     |      |
| Lifespan:        | Up to 50,000 h            |                       |                     |                     |      |
| Warranty:        | 1 year                    |                       |                     |                     |      |
